

## For MACOS Devices Üsküdar University Office 365 Mail Identification

After you open your Mac Mail, click "Add Account ..." in the "Mail" section.  
From here we select the "Exchange" section and say "Resume".

On the screen that comes to our simulator, we enter our information as below and say "Login".  
Our mail address is defined. Once you've decided what you want to sync, we say "done".

You can use our mail anymore. If you want to edit your mail without removing your account follow the steps below.

We call it "Mail Preferences". Here we select the account we want to edit

"Server Settings". We are removing the "Automatically manage connection settings" flag.
